Hotel Content Update best-practice

There are two options available:

1. **Static CSV Data File** :

   Recommend use for first time / manual update periodically **weekly**
   Example: http://xml.agoda.com/hoteldatafiles/**<Partner API Key>**_EN.zip

2. **XML Data Feed** :

Data Feed Implementation

Onboarding partner need to get the hotel information by following this step
   1. Feed 3   : Get all **City_ID** available in Agoda
   2. Feed 5   : Use **City_ID**, to get all **Hotel_ID** (with primary information) available in each city
   3. Feed 6,7,9   : Use **Hotel_ID**, to get information of each hotel e.g. roomtypes per hotel,
                      pictures per hotel, facilities per hotel
   4. Feed 17, 18   : Use **City_ID**, to get hotel description, hotel address for all hotel in each city

   NOTE: Partner can also use **Feed 19**, to get full hotel information covered on Feed 6, 7 and 9 returned in one API call.

Data Feed Refresh

   After partner finish to download full hotel information at the implementation phase, partner should schedule to reload our hotel (change) information **weekly** by following step below

   1. **Feed 11 : XML feed with information of changed hotels since (date)**
      Example: From this link partner will get full list of **Hotel_ID** change from 1 June till today.

      http://xml.agoda.com/datafeeds/Feed.asmx/GetFeed?feed_id=11&apikey=**<Partner API Key>** &mSinceDate=**20160601**

      NOTE: please minimize "mSinceDate" parameter to be as small as possible. There are thousands of updates per day, so if the range is too large, there will be no result return.

   2. Use **Feed 6, 7, 9** or **ONLY Feed 19** to get the updated hotel information.

      http://xml.agoda.com/datafeeds/Feed.asmx/GetFeed?feed_id=19&apikey=**<Partner API Key>** &mhotel_id=12133

3. Getting hotel information in others language by specify **olanguage_id** as optional parameter
   a. Use **Feed 13** to get all Agoda language code.
      http://xml.agoda.com/datafeeds/Feed.asmx/GetFeed?feed_id=13&apikey=**<Partner API Key>**

   b. Specify preferred language as parameter in Feed 19
      http://xml.agoda.com/datafeeds/Feed.asmx/GetFeed?feed_id=19&apikey=**<Partner API Key>** &mhotel_id=12133**&olanguage_id=6**
